

The use of “Alt” and “Title” attribute in images and it's important.

>> Uses of “Alt” attribute:

- The alt tag is used by screen readers, which are browsers used by people with a visual impairment for example. These screen readers tell them what is on the image by reading the alt tag.

```

```

>>Importance:

- There might be a case when an image is not render due network or any other issue. On that case it will be bad experience for the user to make it better we use alt attribute.
- Sometimes due to slow network image might be render slowly, with the help of alt attribute now user can get some information without image being render.

>> Uses of “title” attribute:

- Title attribute on images is used to give exact title of the image. It is seen when we hover the mouse over the image.

```
<title>Document</title>
```

>> Importance:

- Sometimes we need to get exct information about image. Like identification of a aperson or place content on image.
